

How To Use Your Telescope

Free session with the Prairie Astronomy Club

<http://www.prairieastronomyclub.org>

Did you receive a new telescope for the holidays, birthday or just your own purchase? Would you like some help learning how to use it? Or have you been thinking of buying a telescope and could use some advice? The Prairie Astronomy Club can help.

On Tuesday evening, January 31st, 2012 from 7:30 to 9 p.m., there will be a FREE telescope help session for the general public. It won't be "high-tech," just friendly, knowledgeable help provided by the members of the Prairie Astronomy Club. The session will take place at Hyde Memorial Observatory on the south side of Holmes Lake in Lincoln, Nebraska. Those who attend are invited to bring their own telescopes for instructions on their use. Members of the Astronomy Club are familiar with many different types of telescopes. They will be there to assist you in making your telescope an exciting window to science and the universe.

The Prairie Astronomy Club holds monthly meetings open to the general public on the last Tuesday of each month, unless the date conflicts with a major holiday. The meetings are held at 7:30 p.m. at the Hyde Memorial Observatory located in Holmes Park in southeast Lincoln, Nebraska. The club is dedicated to encouraging the study of Astronomy and related subjects for the benefit of its members and the general public.
